

Dr. Jennifer Hyndman is a Professor and the Chair in the Department of Mathematics at the University of Northern B.C. She completed her Ph.D and M.A. from the University of Colorado and her B.A. from the University of Waterloo. Her research interests include Universal Algebras, Interpretation of Varieties, Duality Theory, and Unary Algebras. She is the winner of the 2010 Canadian Mathematical Society Excellence in Teaching Award and UNBC 2003 Teaching Excellence Award.

She sees mathematics in everything including the lace she makes and the dancing she does. She balances her work/life equation by regularly competing in the Prince George Dance Festival.
