

Tim Swartz is Full Professor in the Department of Statistics and Actuarial Science at Simon Fraser University. He completed his PhD and MSc in Statistics at the University of Toronto and his BMath at the University of Waterloo. He is the author of over 60 peer-reviewed publications and two books. His interests include Bayesian methods and applications, statistical inference and statistics in sport. In his spare time, he likes to watch almost every sport imaginable; occasionally he plays some of these sports.
